

# Memorandum

**Date:** July 2, 2007

**To:** Subrata Basu, AIA, AICP, Interim Director  
Department of Planning and Zoning

**From:** Jose Gonzalez, P.E., Assistant Director  
Environmental Resources Management

**Subject:** C-12 #Z2007000172  
Roger Wolin and Dorothy G. Wolin  
7677 Ponce de Leon Road  
District Boundary Change from EU-1 to EU-S  
(EU-1) (1 Acres)  
31-54-41

A handwritten signature in black ink, appearing to read "Jose Gonzalez", written over the printed name in the "From:" field.

---

The Department of Environmental Resources Management (DERM) has reviewed the subject application and has determined that it meets the minimum requirements of Chapter 24 of the Code of Miami-Dade County, Florida (the Code). Accordingly, DERM may approve the application, and the same may be scheduled for public hearing.

## Potable Water Service

Public water can be made available to the subject property. Therefore, connection of the proposed development to the public water supply system shall be required, in accordance with Code requirements.

Existing public water facilities and services meet the Level of Service (LOS) standards set forth in the Comprehensive Development Master Plan (CDMP). Furthermore, the proposed development order, if approved, will not result in a reduction in the LOS standards, subject to compliance with the conditions required by DERM for this proposed development order.

## Wastewater Disposal

Public sanitary sewers are not located within feasible distance for connection to the subject property; consequently, any proposed development would have to be served by a septic tank and drainfield, as a means for the disposal of domestic liquid waste. DERM has no objection to the interim use of a septic tank and drainfield, provided that the maximum sewage loading allowed by Section 24-43.1(3) of the Code is not exceeded. Based on available information, the proposed single-family residence or duplex served by a septic tank would not exceed the maximum allowable sewage loading for the subject property.

## Stormwater Management

All stormwater shall be retained on-site utilizing properly designed seepage or infiltration drainage structures. Drainage plans shall provide for full on-site retention of the stormwater runoff of a 5-year/1-day storm event.

Site grading and development shall comply with the requirements of Chapter 11C of the Code.

Any proposed development shall comply with County and Federal flood criteria requirements. The proposed development order, if approved, will not result in a reduction in the LOS standards for flood protection set forth in the CDMP, subject to compliance with the conditions required by DERM for this proposed development order.

#### Wetlands

The subject property does not contain jurisdictional wetlands, as defined in Section 24-5 of the Code; therefore, a Class IV Wetland Permit will not be required.

The applicant is advised that permits from the Army Corps of Engineers (305-526-7181), the Florida Department of Environmental Protection (561-681-6600), and the South Florida Water Management District (1-800-432-2045), may be required for the proposed project. It is the applicant's responsibility to contact these agencies.

#### Tree Preservation

The subject property may contain specimen-sized (trunk diameter 18 inches or greater) trees. Section 24-49.2(II) of the Code requires that specimen trees be preserved whenever reasonably possible. A Miami-Dade County Tree Removal Permit is required prior to the removal or relocation of any tree that is subject to the Tree Preservation and Protection provisions of the Code. Said Tree Removal Permit shall meet the requirements of Sections 24-49.2 and 24-49.4 of the Code.

The applicant is required to comply with the above tree permitting requirements. DERM's approval of the subject application is contingent upon inclusion of said tree permitting requirements in the resolution approving this application. The applicant is advised to contact DERM staff for additional information regarding tree permitting procedures and requirements prior to site development.

#### Enforcement History

DERM has found no open or closed enforcement record for the subject property.

#### Concurrency Review Summary

DERM has conducted a concurrency review for this application and has determined that the same meets all applicable LOS standards for an initial development order, as specified in the adopted CDMP for potable water supply, wastewater disposal, and flood protection. Therefore, the application has been approved for concurrency, subject to the comments and conditions contained herein.

This concurrency approval does not constitute a final concurrency statement and is valid only for this initial development order, as provided for in the adopted methodology for concurrency review. Additionally, this approval does not constitute any assurance that the LOS standards would be met by any subsequent development order applications concerning the subject property.

This memorandum shall constitute DERM's written approval, as required by the Code.

If you have any questions concerning the comments, or wish to discuss this matter further, please contact Enrique A. Cuellar at (305) 372-6764.
